SUMMARY

Frontend Developer with 2 years of commercial experience building SaaS platforms and e-commerce applications using React, Next.js, and TypeScript.

I enjoy turning complex ideas into intuitive, functional products and finding creative solutions to technical challenges. My curiosity goes beyond web development — I love experimenting with automated greenhouse systems and exploring how software interacts with the physical world.

Outside of technology, I enjoy figure skating, dancing, fitness, and experimenting with restaurant-inspired recipes. Whether I'm coding, cooking, or working on a personal project, I love learning new things, improving the details, and seeing ideas come to life.

PROFESSIONAL EXPERIENCE

Frontend Developer 08/2024 – 10/2026
WebStead Moscow, Russia

- Developed and maintained commercial SaaS, e-commerce, and corporate web applications using React, Next.js, TypeScript, and JavaScript.
- Implemented interactive dashboards, authentication-related interfaces, CRUD functionality, complex forms, and REST API integrations.
- Built reusable UI components and responsive interfaces, using Redux Toolkit for application state management where needed.
- Worked with existing codebases, investigated bugs, improved UI functionality, and delivered features through Git-based workflows.

PROJECTS

Spinny
SaaS Web Application

- Next.js · React · TypeScript · REST API · React Hook Form · Yup · JWT
- Developed a production SaaS application with authentication, dashboard functionality, CRUD operations, statistics and tariff management.
- Built complex forms with validation, reusable UI components and interactive application flows, including drag-and-drop functionality and REST API integration.

Cantexniki
E-commerce Platform

- Next.js · React · TypeScript · Redux Toolkit · REST API
- Developed product catalog, filtering and shopping cart functionality with Redux Toolkit state management and REST API integration, implementing responsive interfaces across desktop and mobile devices.

SKILLS

- Frontend: React, Next.js, TypeScript, JavaScript, Redux Toolkit, HTML, CSS, SCSS
- Additional Technologies: Java, Spring Boot, SQL, PostgreSQL
- Web Development: REST APIs, Authentication Flows, Form Validation, Responsive Design, Reusable UI Components
- Tools: Git, GitHub, GitLab, Docker, Figma, WordPress

EDUCATION

Master's Degree in Application Development 09/2024 – 07/2026
Brno University of Technology — Faculty of Information Technology
Relevant areas: Java, Spring, databases, software engineering, distributed systems, C/C++

Bachelor's Degree in Information Systems and Technology 09/2021 – 07/2024
Brno University of Technology — Faculty of Information Technology
