📄 Slovak national D visa — in progress 🏠 Relocating to Bratislava, Slovakia

SUMMARY

Frontend Developer specializing in React, Next.js and TypeScript, building production web applications across SaaS and e-commerce. Experienced with REST APIs, authentication, complex application flows, state management and responsive UI development. MSc in Application Development from Brno University of Technology, with a strong software engineering foundation and additional Java/Spring Boot experience. Relocating to Bratislava and looking to contribute to a product-focused engineering team in Slovakia.

PROFESSIONAL EXPERIENCE

Frontend Developer

WebStead 🔗

08/2024 – 10/2026

Moscow, Russia

- Develop and maintain production web applications for SaaS, e-commerce and corporate clients using React, Next.js, TypeScript and JavaScript.
- Build application functionality including authentication flows, dashboards, CRUD interfaces, complex forms, filtering, state management and REST API integrations.
- Develop reusable UI components and responsive interfaces, maintain existing codebases, troubleshoot production issues and deliver new functionality through Git-based workflows.

PROJECTS

Spinny 🔗

SaaS Web Application

- Next.js · React · TypeScript · REST API · React Hook Form · Yup · JWT
- Developed a production SaaS application with authentication, dashboard functionality, CRUD operations, statistics and tariff management.
- Built complex forms with validation, reusable UI components and interactive application flows, including drag-and-drop functionality and REST API integration.

Cantexniki 🔗

E-commerce Platform

- Next.js · React · TypeScript · Redux Toolkit · REST API
- Developed product catalog, filtering and shopping cart functionality with Redux Toolkit state management and REST API integration, implementing responsive interfaces across desktop and mobile devices.

Moonera Habitat 🔗

Premium Furniture Catalog — In Development

- Next.js · React · TypeScript · REST API
- Developing a responsive product catalog with category and product pages, interior/editorial sections and API-driven content based on high-fidelity designs.

SKILLS

- Frontend: React · Next.js · TypeScript · JavaScript · Redux Toolkit · HTML · CSS · SCSS
- Backend: Java · Spring Boot · SQL · PostgreSQL
- Web Development: REST APIs · Authentication · Responsive UI · Form Validation
- Tools: Git · GitHub · GitLab · Docker · Figma · WordPress

EDUCATION

Master's Degree in Application Development

Brno University of Technology — Faculty of Information Technology
